Demand No – 81
DEPARTMENT OF INFORMATION TECHNOLOGY & COMMUNICATION

Introduction

The Department of Information Technology & Communication (IT&C) plays the crucial role of managing and leveraging technology to improve the efficiency and effectiveness of government operations, as well as to promote digital literacy and economic growth. Some of the key areas where the Department of IT&C is important for the Nagaland Government are:

E-Governance:

The Department of IT&C is responsible for implementing e-governance initiatives, such as the development of online portals for citizen services, digital payment systems, and other technology-enabled services that make government services more accessible and efficient.

Digital literacy:

The Department of IT&C is also responsible for promoting digital literacy and skills development among citizens, which is crucial for enabling individuals and businesses to take advantage of the benefits of technology and participate in the digital economy.

Infrastructure development:

The Department of IT&C is involved in the development of IT infrastructure across the state, including the establishment of Software Technology Parks of India, the installation of high-speed internet connectivity and the provision of other technology-related infrastructure to support the growth of the IT sector.

Cybersecurity:

With the increasing prevalence of cyber threats, the Department of IT&C plays a critical role in ensuring the security and integrity of government data and systems, as well as in raising awareness among citizens about the importance of cybersecurity.

Overall, the Department of IT&C is essential for enabling the Government of Nagaland to embrace technology and leverage it to drive development and growth across the state.

The Department is actively working towards bringing the latest state of art technology to take the State of Nagaland to the next level through adoption of e-Governance and latest ICT based technologies and to this end, sincere efforts have been made to improve electronic public service delivery to citizens in a transparent, efficient and cost-effective manner.

The world is now looking up to India to drive the global economic growth and towards this end, the Department of IT&C has been on working on the theme, **“Towards promotion of secured digital services and Investment opportunities in the State of Nagaland”** during the FY 2022-23.

The Department of IT&C also performs the functions of the Secretariat for the IT Council and the State Level Coordination Committee for IT applications and the following are the executive business and duties:

- Formulating State IT Policy.
- Planning & Coordination of IT related programmes and projects.
- Technical support to Government Departments for IT enabled services.
- Research & Development of new technologies and prescribe uniform standards.
- Pro-active promotion of Citizen Centric services
- Capacity Building and organizing of IT events.
- Planning, providing Internet access, Network security, Bandwidth management etc.
- Implementation of core infrastructure projects under the National e-Governance Plan (NeGP)
- E-governance initiatives.
- Co-ordinating e-Procurement and Tendering activities.

The Nagaland State e-Governance Society (NSeGS) which functions under the Department IT&C is the designated nodal agency for implementation of National e-Governance Plan (NeGP) and Digital India initiatives. The core infrastructure projects under the National e-Governance Plan (NeGP) / Digital India consists of the State Data Centre, State Wide Area Network, State Portal & State Services Delivery Gateway, Capacity Building and Common Service Centre. The basic core infrastructures are now ready for full-fledged e-Governance activities to take off. The Department of IT&C is also facilitating various Departments in implementation of their respective electronic service-related Mission Mode Projects.

Core IT Activities and Projects

1. State Wide Area Network (SWAN) & GSTN

The Nagaland State Wide Area Network is the backbone network for data, voice and internet in the State and continues to provide connectivity with data, voice and video communications in the State.

The Nagaland State Wide Area Network (NagaSWAN) is a high-speed data communication network that connects various government offices and departments within the State and has lead to:-

- i. Improved communication and collaboration:** The SWAN provides a common platform for communication and collaboration among various government departments and agencies, facilitating faster and more efficient exchange of information and data.
- ii. Enhanced e-governance services:** The SWAN can help improve the delivery of e-governance services to citizens by enabling faster and more secure access to government services through various channels, such as online portals, mobile apps, or other digital platforms.
- iii. Improved disaster recovery and business continuity:** The Nagaland SWAN serves as a backup for critical government systems and applications in case of a disaster or outage, helping to ensure continuity of government operations.
- iv. Increased cybersecurity:** The Nagaland SWAN provides a more secure platform for communication and data exchange within the government, helping to prevent data breaches and cyber attacks.

The NagaSWAN also continues to provide connectivity for Goods and Services Taxes Network (GSTN) in the State by providing connectivity from Nagaland State Wide Area (SWAN) Point of Presence (PoP) at the District Head Quarter to all Taxes offices at the districts, with the Network Operating Centre at NagaSWAN SHQ Kohima.

2. The Nagaland State Data Centre (NSDC)

The Nagaland State Data Centre (NSDC) which is one of the most critical core technical infrastructure which the Department of IT&C has been managing by itself without engaging the support of any Data Centre Operators (DCOs). It is providing various consolidated services such as hosting applications and infrastructure to facilitate provisioning of efficient electronic service delivery of Government to Government (G2G), Government to Citizen (G2C), Government to Business (G2B) services etc.

The Nagaland State Data Center (NSDC) is a centralized facility designed to store, manage and disseminate data and applications for government services. and provides the following services to the Government of Nagaland:

- i. Data storage and management:** The NSDC provides a secure and reliable platform for storing and managing large amounts of government data, including citizen information, financial records, and other sensitive data which ensures the integrity and availability of data, as well as compliance with data privacy and security regulations.
- ii. Disaster recovery and business continuity:** The NSDC also provides a backup for critical government systems and applications in case of a disaster or outage which helps ensure continuity of government operations, even in the face of unexpected events.
- iii. Enhanced e-governance services:** The NSDC facilitates the delivery of e-governance services to citizens, by providing a common platform for hosting applications and data that can be accessed by citizens through various channels, such as online portals, mobile apps, or other digital platforms.
- iv. Improved collaboration and data sharing:** The NSDC can help promote collaboration and data sharing among different government agencies and departments, by providing a centralized platform for sharing data and resources leading to improved coordination and decision-making across the government.

The NSDC which was upgraded to cater to the requirements of the State Government has acted as a secure, reliable and homegrown Data Centre for all of the Government's Digital Services, websites and applications. Presently, NSDC is hosting 117 Government websites and 13 Mobile Applications providing information and e-Governance related services to the citizens.

3. State Portal & State Services Delivery Gateway

The Nagaland State Portal acts as the Single Window for information to various Government data like Notifications, Circulars, Press Releases, Tenders and other pertinent information of the State. The Nagaland State Portal and State Services Delivery Gateway (SP&SSDG) was inaugurated in the year 2011 and is accessible at www.nagaland.gov.in.

The Nagaland State Portal is an important tool for modernizing and improving governance in the digital age, enabling improved citizen engagement, transparency, e-governance services and economic growth for the State Government. A few of the visible impacts of the Nagaland State Portal are:-

- i. **Improved citizen engagement:** The State Portal helps improve citizen engagement with the government by providing citizens with easy access to information about government activities, programs and policies which includes news updates, press releases and other information that can help citizens stay informed about government activities.
- ii. **Increased transparency:** The State Portal helps to promote transparency in government operations by providing citizens with easy access to information about government policies, programs and activities which helps build trust between citizens and the government and reduce corruption and malfeasance.
- iii. **Enhanced e-governance services:** The State Portal serves as a platform for delivering e-governance services to citizens, such as online portals for citizen services, digital payment systems, and other technology-enabled services that make government services more accessible and convenient.

The Nagaland State Portal has been recognized as the best performing State Portal among the "North East and Hill States" category by the Department of Administrative Reforms & Public Grievances (DARPG), Govt. of India in the recently concluded ***National e-Services Delivery Assessment 2021 (NeSDA) for the 2nd consecutive year.***

NeSDA 2021 Ranking for Nagaland State Portal

4. District MMP

The eDistrict MMP aims to create an online platform to computerize the workflows of the end User Departments making the process of application and delivery of service transparent and efficient. The eDistrict Application has recently undergone a rigorous Software Testing and Security Audit by the Software Testing and Quality Control (STQC) Center, Government of India and has been found to be robust, secure and a scalable Software Application.

This platform provides 30 (Thirty) high demand e-Services from various Government Departments. The e-District Nagaland Online System had enabled the Nagaland Public Service Commission (NPSC) to introduced its One Time Registration (OTR) e-Service for all intending Civil Service Candidates which has been a grand success and is being actively used by the NPSC for conducting their Examinations and since 2018 a total of 1,40,007 transactions have been made through this platform.

5. Common Service Centre (CSC)

Common Service Centers (CSCs) are access points that provide various government and private sector services to citizens in rural and remote areas of India. These centers are established and managed by the Ministry of Electronics and Information Technology (MeitY), Government of India, as part of the Digital India initiative.

CSCs are essential to Nagaland State as they enable the delivery of various services such as healthcare, education, financial services, and government-to-citizen services. They serve as a one-stop-shop for citizens to access various online and offline services such as:

- Aadhaar Enrolment
- Banking services
- G2C (Government-to-Citizen) services
- Insurance services
- PAN Card services
- PMGDISHA (Pradhan Mantri Gramin Digital Saksharta Abhiyan) services
- Telemedicine services
- Utility bill payments

The CSCs are important to Nagaland State as they help bridge the digital divide by providing access to digital services to the people in remote and rural areas of the state. They also generate employment opportunities for rural youth and women as they can become Village Level Entrepreneurs (VLEs) and run the CSCs. The CSCs also help in the overall development of the state by providing easy access to government and private services, leading to better transparency and good governance. Some of the important activities of CSCs are:

TELELAW

Department of Justice has partnered with NALSA and CSC e-Governance Service India Limited for mainstreaming legal aid to the marginalised communities through Common Services Center (CSC).

Tele-Law means the use of communications and information technology for the delivery of legal information and advice. This e-interaction between lawyers and people would be through the video-conferencing infrastructure available at the CSCs.

The concept of Tele-Law is to facilitate delivery of legal advice through a panel of lawyers stationed at the state Legal Services Authorities (SALSA) and CSC. The project initiates to connect citizens with lawyers through video conferencing facilities by the Para-Legal Volunteers stationed at identified 1,00,000 panchayats. In the month of Feb 2023, a total of 152 cases were registered in the state of Nagaland.

Handed over the OPPO mobile phone from CSC over to VLE Renchumthung Tsanglao (Chumukedima) for his outstanding performance in TeleLaw Service

Telelaw Awareness Program conducted by a VLE in a village in Longleng district

PMJAY

Ayushman Bharat Yojana or National Health Protection Scheme aims to provide a service to create a healthy, capable and content new India. It has two goals: One - creating a network of health and wellness infrastructure across the nation to deliver comprehensive primary healthcare services.

Beneficiaries being handed over E- Cards by VLE from Pungro

ADHAAR CENTRE

Till March 2023, Nagaland CSC has setup two Aadhar Seva Kendra (ASK) enrollment center located in Dimapur and Longeng Districts. Nagaland CSC has also setup two CSC VLE Aadhar Update Center in Dimapur and Chumukidema. More centers are under process. A total of 1136 enrolment done so far.

Aadhaar Enrolment Center, Dimapur

Aadhaar Enrolment Center, Longleng

Digipay (AEPS)

Country's retail payment platform NPCI and CSC e-Governance services India Limited have jointly launched Aadhaar enabled payment system on 09 January, 2016. This service will facilitate withdrawal of government entitlements such as payment under MGNREGA as well as old age pension and PMkisan.

Number of Digipay(AEPS) transaction done through CSCs during Feb 2023 in Nagaland is 656.

Digipay Micro-ATM (MATM) CSC has also launched Micro-ATM (MATM) in Digipay where customer can directly withdraw money from their ATM. Number of Digipay(MATM) transaction done through CSCs in the month of Feb 2023 is 3240. In collaboration with the Ministry of Rural Development, the Self Help Group members are also engaged in Digipay services.

Digipay Services being delivered to citizens

PMGDISHA

The PMGDISHA (Pradhan Mantri Gramin Digital Saksharta Abhiyaan) is a project to make 60 million people literate in rural areas across the States or Union Territories.

The project will empower citizens especially on rural areas by training them to operate computer and other digital access devices for sending and receiving e-mails, browsing the Internet, accessing government services and making digital payments. Etc. It enables them to use Information Technology and related applications, especially digital payments, to actively participate in the nation-building process.

The project aims to bridge the digital divide that specifically targets the rural population, including Scheduled Castes (SC) / Scheduled Tribes (ST), Minorities, Below Poverty Line (BPL), Women, Disabled and Minorities.

Pmgdisha Exam centre run by VLE Vongsangthong at Shamator Town

CSC GRAMEEN e-STORE

CSC Grameen eStore is a revolutionary e-commerce enterprise that reaches world-class products to rural areas of India. We currently cover more than 10,000 pincodes across India.

With more than 4 lakh CSC Grameen eStores, we have disrupted the distribution of goods in India, serving markets that traditional networks have not been able to reach. The real 'Vocal for Local' model.

Using our reach into the deepest parts of India, we enable remote-local manufacturers, including crafts people and indigenous producers, to sell their products online. Thereby giving them access to markets in all parts of the country. 'Vocal for Local' does not get more real than this.

A Renault Car being delivered to a customer through CSC VLE at Kiphire town.

ESHRAM

Ministry of Labour & Employment has developed eShram portal for creating a National Database of Unorganized Workers (NDUW), which will be seeded with Aadhaar. It will have details of name, occupation, address, occupation type, educational qualification, skill types etc. for optimum realization of their employability and extend the benefits of the social security schemes to them. It is the first-ever national database of unorganised workers including migrant workers, construction workers, gig and platform workers, etc. and a total of 181017 cards were generated through CSC across Nagaland.

E-Shram drive in Longleng district

6. Security Audit of Government Websites

Security auditing is essential for all websites, but it is especially critical for government websites. Government websites often contain sensitive information such as personal data, financial information, and confidential government documents. A security breach in a government website can have far-reaching consequences and can compromise national security. The Department of Information Technology & Communication had conducted **Security Audit of 67 (Sixty Seven)** Government Websites during 2022-23.

7. Procurement & Tendering

The Department of Information Technology & Communication is the nodal Department for eProcurement & Tendering and during 2022-23 a total of 13 e-Tenders were floated for an amount of Rs. 28 Crore.

8. Online Inner Line Permit

The Department of Information Technology & Communication continues to maintain and manage the State Online Inner Line Permit Portal (<https://ilp.nagaland.gov.in>) which facilitates the process of obtaining an Inner Line Permit (ILP) for non-residents who intend to visit Nagaland. The ILP is a document that grants permission to non-residents to enter and stay in Nagaland for a limited period. A total of 20883 ILPs have been issued till date.

9. Common Scholarship Portal

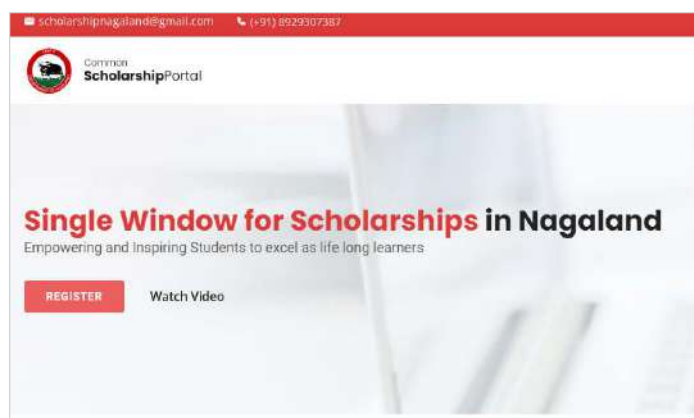

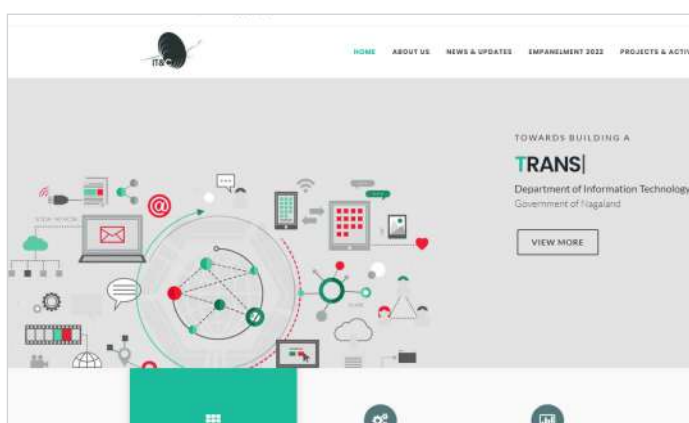

The Department of Information Technology & Communication continues to maintain and manage the State Common Scholarship Portal (<https://scholarship.nagaland.gov.in>) which facilitates the process of obtaining Scholarships by eligible students under various schemes. The Portal is integrated with PFMS and ensures Direct Benefit Transfer (DBT) of scholarships to genuine scholars. During 2022-23 a total of 56279 Scholarship Applications were processed.

10. Nagaland Medical Council Portal

The Department of Information Technology & Communication has developed the Nagaland Medical Council (NMC) Portal cum Dashboard (<https://nmc.nagaland.gov.in>) which provides information to citizens on Registered Doctors in the State and also tracks the performance of Doctors in their continued education programme.

11. Chief Secretary's Dashboard

The Department of Information Technology & Communication has developed the Chief Secretary's Dashboard (<https://csdash.nagaland.gov.in>) with an aim to help tracking of various correspondences between the CS Office and Departments and also to provide a single window for accessing State Level Datasets from various Ministries.

8th edition of the e-Naga Summit 2022

The 8th edition of the e-Naga Summit 2022 was held on 14th December 2022 at the Directorate of Information Technology & Communication under the theme “Towards promotion of secured digital services and Investment opportunities in the State of Nagaland”.

The e-Naga Summit 2022 was organized by the Department of Information Technology & Communication, Government of Nagaland in collaboration with the Indo-British Business Forum (IBBF), United Kingdom. Shri. Mmhonlumo Kikon, Hon'ble Advisor IT&C, stated that the state government's vision was to attract investment to the state to engage the people with experts and companies from other parts of the country and collaborate with the State Government. The CEO, Indo British Business Forum, United Kingdom had stated that the firm was interested to invest in the power and renewable energy sectors in the State of Nagaland.

The e-Naga Summit 2022 was a significant event for the state as it aimed to promote digital transformation and innovation in various sectors of the economy. The summit had several key outcomes and impacts, including:

- i. **Encouraging entrepreneurship:** The Summit provided a platform for entrepreneurs and start-ups to showcase their products and services, and connect with potential investors and customers which encouraged the growth of the local start-up ecosystem and create new job opportunities.
- ii. **Promoting e-governance:** The Summit showcased the various e-governance initiatives undertaken by the Nagaland government, such as the State Data Center and the State Wide Area Network, e-Services etc. and highlighted their benefits for citizens and businesses which has helped improve the delivery of government services and enhance transparency and accountability in government operations.
- iii. **Facilitating partnerships:** The Summit provided a forum for government officials, industry leaders, and academic experts to share their experiences and expertise, and explore opportunities for collaboration and partnership promoting innovation and creation of new opportunities for economic growth.
- iv. **Building digital literacy:** The Summit provided training and capacity-building opportunities for students, entrepreneurs, and government officials, helping to build digital skills and literacy, helping promote the adoption of new technologies and improve the overall competitiveness of the economy of the State.
- v. **Showcasing Nagaland's potential:** The Summit showcased Nagaland's potential as a hub for innovation and technology, highlighting the state's unique culture, natural resources, and human capital. This can help attract investment and talent to the state, and position it as a leader in the digital economy.

The e-Naga Summit 2022 had a positive impact on the economy of Nagaland by promoting digital transformation and innovation, building partnerships and networks, and creating new opportunities for entrepreneurship and economic growth.
